NITYA VODELA

Hyderabad, India | vodelan6@gmail.com | linkedin.com/in/nityavodela | github.com/nityavodela

SUMMARY

Business Analyst and UX-trained product builder transitioning into AI Product Management. Owns requirements and interface design end-to-end across a 13-module telecom ERP platform and full mobile app redesign, functioning as de facto product owner with no handoff gap between requirements and design. Shipped a Generative AI application end-to-end (AI Ethics & Risk Checker) and independently researches AI safety and governance, including Google's SAIF framework - evidence of the systems thinking, risk-to-mitigation reasoning, and bias-to-action instinct AI PM roles require. Software engineering foundation from Accenture; ISO 27001 Lead Auditor certified.

EXPERIENCE

Associate Business Analyst | JNET Technologies Pvt. Ltd. *Jun 2026 – Present*
Hyderabad, India

- Owned the final-stage requirements and UI redesign for a telecom ERP platform in development for 5+ years, driving both the web and mobile versions to production launch within 6 months of joining; now live with 50 active users.
- Own requirements and interface design end-to-end for a telecom ERP platform spanning 13 web modules (3 flows) and a full mobile app redesign (splash, onboarding, 7 module flows) - from stakeholder interviews through BRDs/FRDs into Figma wireframes, with no handoff gap between requirements and design.
- Led UAT cycle surfacing 30 defects and 24 enhancement opportunities pre-release, driving prioritization calls on defect severity vs. release timeline with engineering and operations.
- Manage a rolling requirements pipeline of 17 minor requirements biweekly and 5 major requirements per quarter, coordinating across 2 cross-functional teams to cut requirement-to-release turnaround from 6 weeks to 3 weeks.

Consultant (UI/UX Design) | JNET Technologies Pvt. Ltd. *Dec 2025 – Jun 2026*
Hyderabad, India

- Designed 3 end-to-end user flows (~30 screens) for a restaurant POS application in Figma, covering login, onboarding, splash, ordering, table management, and billing; the application has since shipped to production.
- Built wireframes and interactive prototypes, iterating with stakeholders before handoff to engineering - the design foundation that led to being brought onto the ERP platform as Associate Business Analyst.

Independent Researcher & Writer - AI Safety, Ethics & Policy | Self-employed *May 2025 – Present*
Remote

- Research and write on technical and conceptual issues in AI safety, ethics, and governance, including Google's SAIF framework, adversarial robustness, interpretability, and policy strategy.
- Published "The Rise of Advanced AI Systems" on Medium, breaking down Google's Secure AI Framework for a technical audience.

Software Engineer Intern | Infoshare Systems, Inc. *Jul 2024 – Jun 2025*
Texas, USA (Remote)

- Built Power BI dashboards and reports for internal business data while earning Microsoft Power BI certification, developing data visualization and business reporting fluency.
- Proactively upskilled across product-adjacent domains during the role - UI/UX design fundamentals in Figma, data structures & algorithms for technical interview readiness, and hands-on LLM/prompt engineering practice - laying groundwork for the AI product and design work that followed.

Application Development Associate | Accenture *Jul 2021 – Jul 2022*
Hyderabad, India

- Received and resolved onboarding tickets via ServiceNow, onboarding ~15 client projects onto Jira - setting up project structures, workflows, and permissions.
- Integrated Jira with GitHub to streamline development workflows for enterprise client teams.
- Handled and resolved workflow conflicts within Jira, keeping cross-team project delivery unblocked.
- Worked across Bitbucket and Confluence in Agile sprint teams, supporting sprint documentation and delivery tracking.

PROJECTS

AI Ethics & Risk Checker - *Python, Streamlit, Hugging Face Inference API, Llama-3/Mistral*

- Built and deployed an independent GenAI application that scans text for ethical, privacy, bias, hallucination, and safety risks, returns a colour-coded risk score, and generates a safe rewrite.
- Live: ai-ethics-risk-checker.streamlit.app | GitHub: github.com/nityavodela/ai-ethics-risk-checker

Enhancing Spotify with Personalized Mood & Language Playlists - *independent UX case study*

- Reimagined Spotify's mobile UI so users can categorize and manage playlists by mood and language; led user research, information architecture, and high-fidelity Figma prototypes.

EDUCATION

Master of Science, Computer Science *Aug 2022 – May 2024*

The University of Texas at Arlington - Programming Committee, Excel Campus Activities

B.Tech, Computer Science & Engineering *Graduated 2021*

Gitam University, Hyderabad

SKILLS

AI/ML & Data: Generative AI / prompt engineering, LLM application development, AI safety & governance (SAIF), bias/risk evaluation, Power BI (certified), SQL basics

Product & Roadmap: Requirements-to-roadmap translation, backlog prioritization, stakeholder management, cross-functional leadership, Agile/Scrum, UAT ownership

Design: Figma, wireframing, prototyping, usability review - direct UX collaboration experience

Tools: Jira, Confluence, Bitbucket, ServiceNow, Azure DevOps, GitHub

Certifications: Microsoft Power BI | Google AI Essentials (Coursera) | ISO 27001 Lead Auditor (TÜV NORD)
